

KATE BEATON

EAU CLAIRE CITY COUNCIL - AT-LARGE

VOTE APRIL 5TH

I am proud to have served the Eau Claire community -- as a food security and environmental stewardship coordinator for UW-Extension, a steering committee member for 15 Now Northwest Wisconsin, on the Citizen Advisory Committee for the 2015 Comprehensive Plan Update, as the leader of the steering committee for the Chippewa Valley Sustainable Future Festival, and more!

I wish to serve our community on the Eau Claire City Council to promote social, economic, and environmental justice and enhance the quality-of-life amenities that has made Eau Claire a place people want to live and work!

If you want to see an even better Eau Claire, I need your vote on Tuesday, April 5th!

FOOD EQUITY

Food insecurity is a prevailing problem in Eau Claire. With 1 in 5 children food insecure, we have a lot of work to do. As the founder of Market Match, a city-sponsored program which doubles the purchasing power for FoodShare users at the farmers' market, I have experience addressing this tough issue. I will use my experience to expand access to healthy food for all people and to help our local farmers by supporting a year-round public market in the Cannery District (formerly the West Bank).

PUBLIC TRANSPORTATION

As a Councilwoman I will advocate to increase funding for public transit and make a new downtown transit center a budget priority. Public transit makes it possible for our low-income neighbors to make it to work, school, and the grocery store and also reduces need for fossil fuels, slowing climate change. I pledge to support Eau Claire Transit as a City Councilwoman.

SMALL BUSINESS

Our small, locally owned businesses bring a unique culture to our city, enhance our local economy, and provide viable jobs for Eau Claire residents. That's why it will be my priority to support downtown redevelopment, programs to prepare workers for the job market, and policies that provide livable wages to people trying to support themselves and their families.
